The recent past...

Transboundary Diagnostic Analysis

With the support of the GEF, UNEP, UNEP/MAP, and FFEM, the Mediterranean countries have collaborated within the context of the Barcelona Convention to revise the Transboundary Diagnostic Analysis prepared in 1997, and have agreed on the following major transboundary environmental concerns for the basin:

- Decline of biodiversity
- Decline in fisheries
- Decline in seawater quality
- Human health risks
- Loss of groundwater dependent coastal ecosystems

SAP MED and SAP-BIO

Following the revision of the TDA, and with the support of GEF, the Mediterranean countries have worked together to set priorities related to these transboundary problems and have jointly agreed on what interventions are needed to address such priorities through two Strategic Action Programs (SAPs):

- The Strategic Action Program to Address Pollution from Land-Based Activities (SAP MED); and
- The Strategic Action Program for the Conservation of Mediterranean Marine and Coastal Biological Diversity (SAP BIO).

The present and the future...

- The GEF SP for the Mediterranean LME, will be implemented by UNEP and the WB, and executed by UNEP/MAP and a number of co-executing agencies.
- It responds directly to priorities of the countries of the Mediterranean Sea basin as identified in the Transboundary Diagnostic Analysis, and to the agreed interventions as outlined in the two Strategic Action Plans, SAP-BIO and SAP-MED which are now ready for implementation.
- The Partnership will serve as a catalyst in leveraging policy/legal/institutional reforms as well as in bringing in additional investments for reversing the degradation of the Mediterranean large marine ecosystem, its contributing freshwater basins, its habitats and coastal aquifers.

The Barcelona Convention includes the following Protocols:

- The Protocol for the Prevention and Elimination of Pollution of the Mediterranean Sea by Dumping from Ships and Aircraft or Incineration at Sea;
- The Protocol Concerning Co-operation in Preventing Pollution from Ships and in Cases of Emergency, Combating Pollution of the Mediterranean Sea;
- The Protocol for the Protection of the Mediterranean Sea against Pollution from Land-Based Sources and Activities (LBS Protocol);
- The Protocol Concerning Specially Protected Areas and Biological Diversity in the Mediterranean;
- The Protocol Concerning Pollution Resulting from Exploration and Exploitation of the Continental Shelf, the Seabed and its Subsoil; and
- The Protocol on the Prevention of Pollution of the Mediterranean Sea by Transboundary Movements of Hazardous Wastes and their Disposal.

The structure of MAP: Guaranteeing Country Ownership

- Meetings of the Contracting Parties (COPs). The COP is the body for adopting legally binding decisions. It meets every two years.
- Bureau of the Contracting Parties. A subordinate body comprising representatives of six contracting parties. The Bureau meets approximately twice a year and deals with various matters in the intersessional periods between COPs.
- The Coordinating Unit located in Athens, Greece, which
 is the official Host Country of MAP. The Coordinating
 Unit is responsible for supervising all activities related to
 MAP under the Barcelona Convention.

The GEF Strategic Partnership

Participating Countries

Executing, Co-executing Agencies

Albania

Algeria

Bosnia and Herzegovina

Croatia

Egypt

Lebanon

Libya

Montenegro

Morocco

Syria

Tunisia

Turkey

*The Palestinian Authority is also participating

Sub-Projects

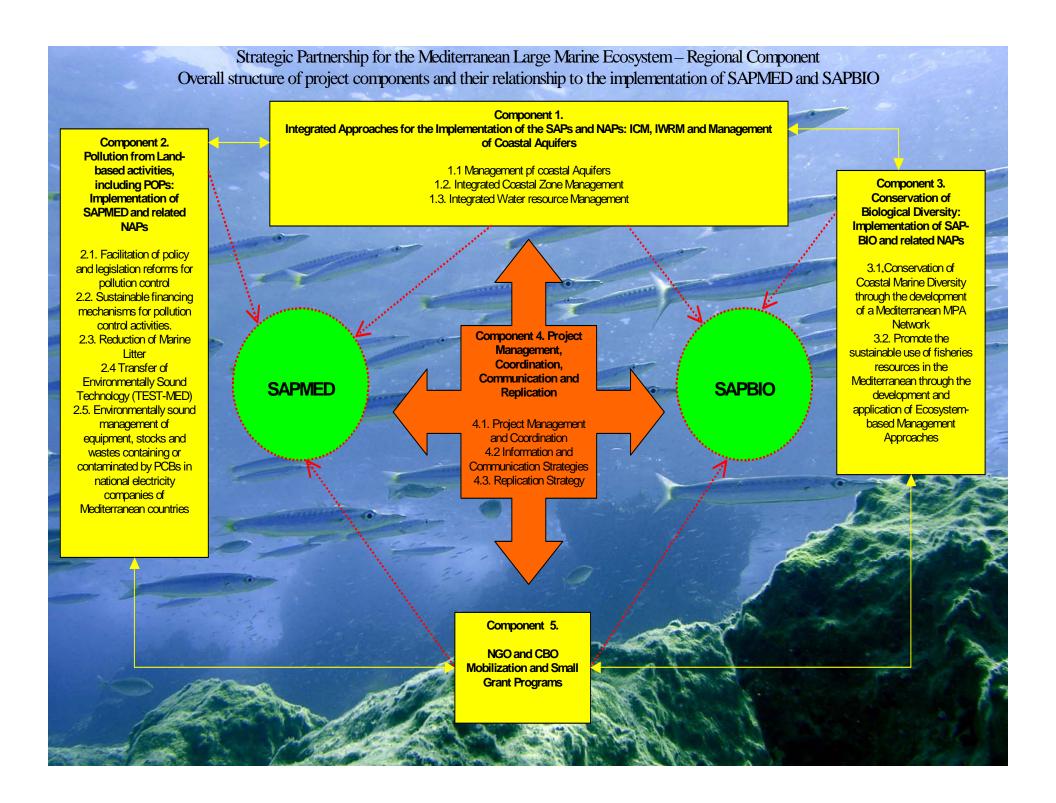

Component 1: Integrated Approaches for the Implementation of SAPs and NAPs: ICM, IWRM and Management of Coastal Aquifers.

Component 2: Pollution from Land-Based activities, including POPs: Implementation of SAPMED and related NAPs.

Component 3: Conservation of Biological Diversity:
Implementation of SAP-BIO and related NAPs
Component 4: Project Management, Coordination,
Communication and Replication

Component 5: NGO and CBO Mobilization and Small Grant Program

Implementation of SAPMED and SAPBIO In participating countries

Project Components

Component 1. Integrated approaches for the implementation of the SAPs and NAPs

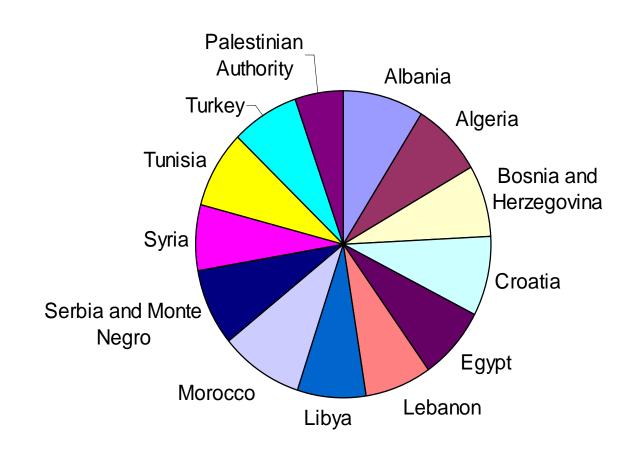

- 1.1. Management of Coastal Aquifers and Groundwater
- 1.2. Integrated Coastal Management
- 1.3.Integrated Water Resource Management

Component 2. Pollution from Land-based-Activities, including Persistent Organic Pollutants: implementation of SAP-MED and related Naps

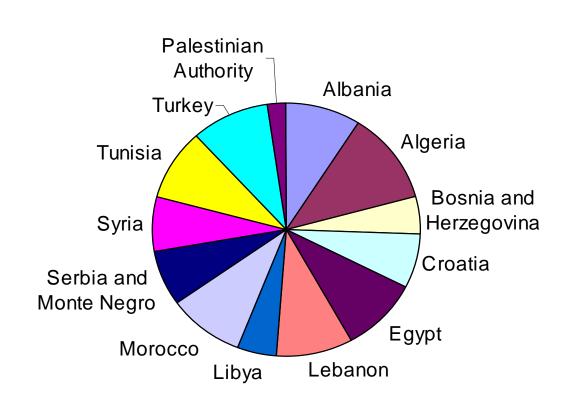

- 2. 2.1. Facilitation of policy and legislation reforms for pollution control
- 2.2. Sustainable financing mechanisms for pollution control activities
- 2.3. Reduction of Marine Litter
- 2.4. Transfer of Environmentally Sound Technology (TEST/MED)
- 2.5. Environmentally sound management of equipment, stocks and wastes containing or contaminated by PCBs

Distribution of Activities to be undertaken in Participating Countries, 41 different activities, many of them in all countries

Distribution of Pilot/Demonstration Projects, 72 in total (excluding Small Grant projects which are to be defined during the project, approx. 50)

Budget elements of the Project

	GEF:	- <u>Project</u>	19,551,250	
		International Waters (OP#9)	10,901,250
