Information System
on know how in the
water sector**

DG ENV

EURO-MEDITERRANEAN PARTNERSHIP

Context of EMWIS activities

- 1995 Euromed Partnership
- 1996 Euromed Ministers Initiate EMWIS
- 1999 EMWIS operational launch
- 2005 EMWIS first activities on data management
- 2008 UfM Water Ministerial conference Long Term Water Strategy initiated

Focus on know-how sharing

- 9 years of operation
- 20 countries
- About 50 000 visitors per month

➤ **Confidence between water authorities**

• Feasibility studies of National Water

Information Systems (Algeria, Cyprus, Israel, Jordan, Lebanon, Malta, Morocco, Palestine, Tunisia, Turkey)

• Preliminary analysis for a Mediterranean Water Observation Mechanism - 2006-2007

(7 national diagnostic studies, 25 international initiatives consulted)

- **UfM Mediterranean Water Strategy**
 - ❑ Strengthening the provision of data, information and statistics on water
- **Arab Countries water strategy**
 - ❑ Database on shared water resources
- **EU - Horizon 2020 – Depolution of Mediterranean sea**
 - ❑ Monitoring: Urban waste water, Industrial emission and Urban solid waste
 - ❑ Extension of Shared Environmental Information System
- **UNEP - Mediterranean Strategy for Sustainable Development**
 - ❑ Resources and Demand indicators
- **UN – Water => World Water Assessment Programme**
 - ❑ Total freshwater renewable resources
 - ❑ MDG goals
 - ❑ Water abstraction per sector

2009-2010 Activities

□ Preparation of regional activities (concept note)

- Coordinating data collection mechanisms
- Harmonisation of definitions (interoperability)
- Fostering NWIS as main source of reliable data
- Exchange of experiences

□ Metadata catalogue (data discovery)

□ Map viewer and administrative reference data sets for the region

□ Interoperability guidelines

- Recommendations on standards
- Data models

□ Data harmonisation pilot

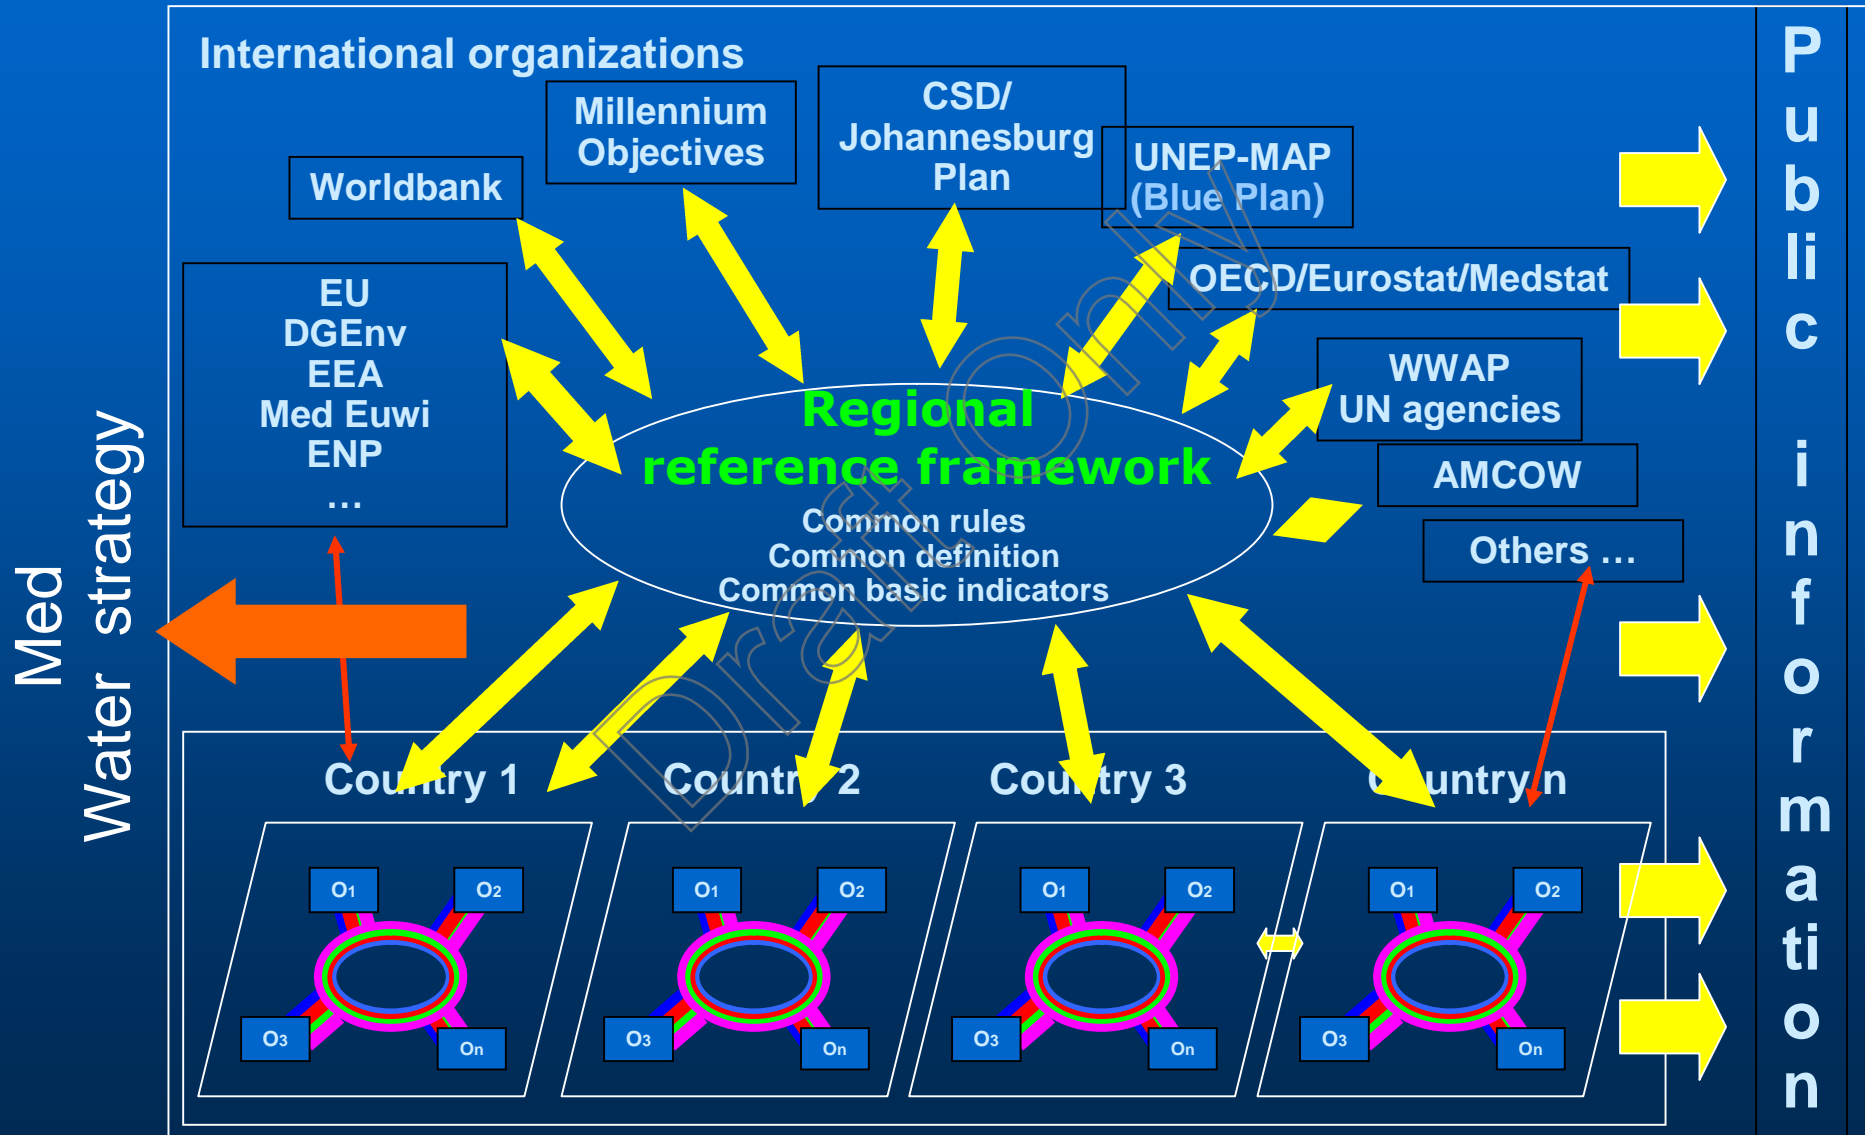

- Tunisia and Jordan
- Based on UN water accounting approach

□ National technical workshops:

- State of plays on National Water Information systems
- Tunisia, Lebanon, Jordan, Egypt, Palestine, Morocco, Syria, Turkey

*With EC DG
Env support*

Overall Mediterranean vision

Shared Water information Systems

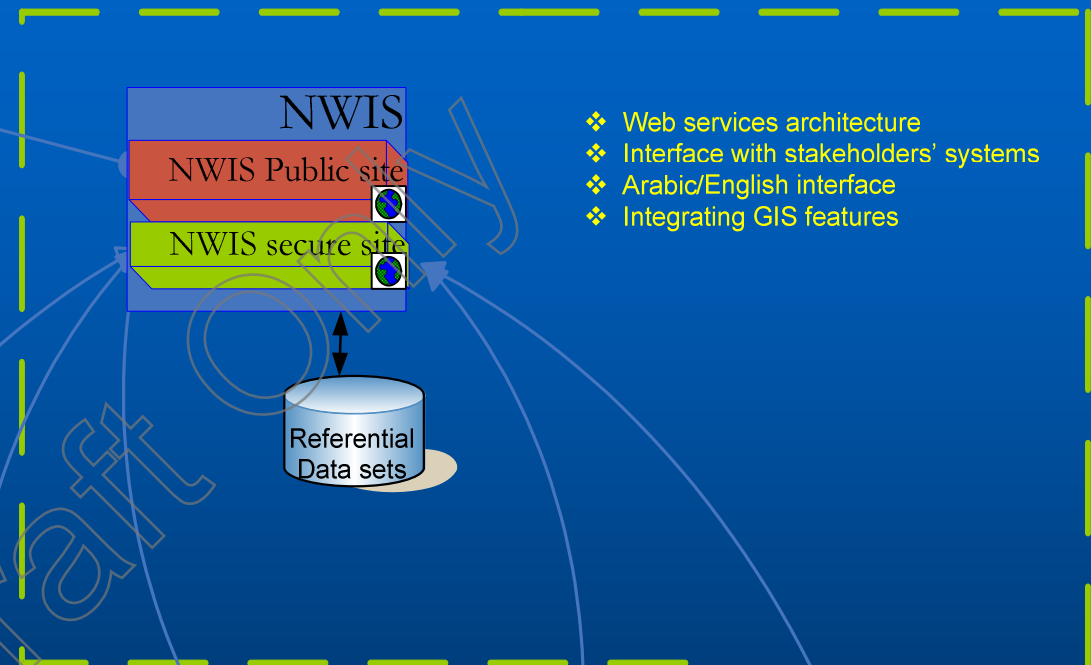

NWIS Management

Data access right defined by data owners

Data exchanges can be restricted to a close group of stakeholders

Web navigator

Stakeholders

Content of a reference data framework

- **Referential datasets**
 - Hydrological networks (e.g. rivers, watersheds, lake, aquifers)
 - Water management areas (e.g. protected areas, administrative units)
 -
- **Data dictionaries (data models, reference lists)**
 - => Generic conceptual data model developed
- **Definition of indicators, data collection methods**
 - => Pilot activity on going on water quantities
- **Geo-catalogue of data sources and data services**
 - ⇒ Prototype available with a Mediterranean profile
 - ⇒ Linked map viewer under development
- **Interoperability specifications (exchange formats/ service protocols)**
 - => Recommendations on standards to be used (for SEIS/WISE/INSPIRE interoperability)

NWIS basic principles

- **Information should be managed as close as possible to its source**
 - Multiple partners/providers
- **Information collected once and shared with others for many purposes**
 - Different aims / user categories
 - Interoperability, geographical scales
- **Provision to the public of aggregated data**
- **Unique provider for each data type**
- **Gouvernance**
 - Strategic -> needs
 - Technical -> referential data sets
 - Basins (or management units) -> data collection

NWIS vision

- **Governmental system**
 - ❑ Interministerial intranet
 - ❑ Limited public access
 - ❑ Sub-systems managed by each partner
 - ❑ Node of a broader system
 - SEIS
 - eGov infrastructure
- **User categories**
 - ❑ Executive / decision makers (incl. other ministries)
 - ❑ Experts
 - ❑ General public
- **Technical issues**
 - ❑ Web based system integrating thematic sub-systems
 - ❑ Graphical user interface, geographical data access
 - ❑ Using international data standards

NWIS governance

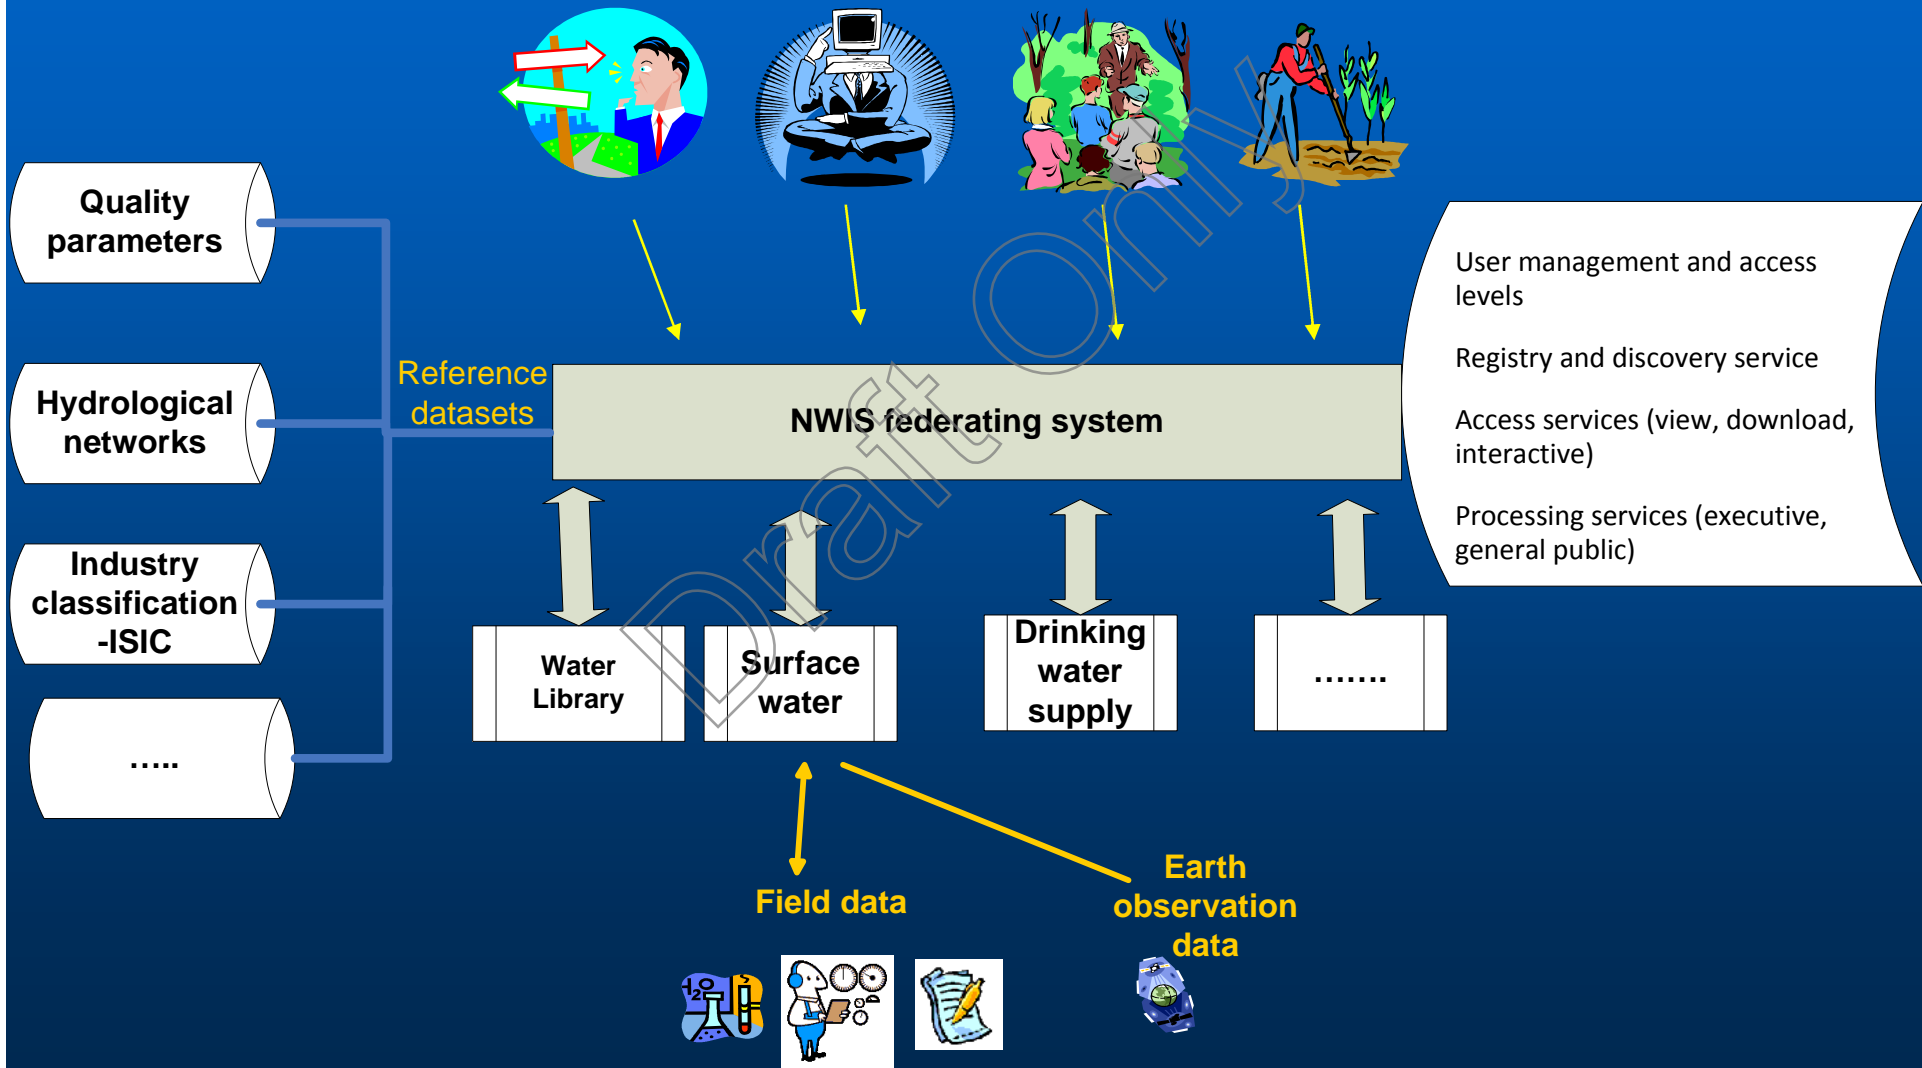

- **Interministerial body:**
 - ❑ Rely on an existing body
 - ❑ MoU on management / data sharing rules
 - ❑ Specific agreements on datasets to be shared, incl. publications
 - ❑ Defining priorities and further developments
 - ❑ System validation
 - ❑ Fund raising requests
 - ❑ Members: public institutions partners of the NWIS

- **Technical coordination committee**
 - ❑ In charge of implementation and system management
 - ❑ Definition of thematic developments and reference data sets
 - ❑ Involving focal points from each stakeholder

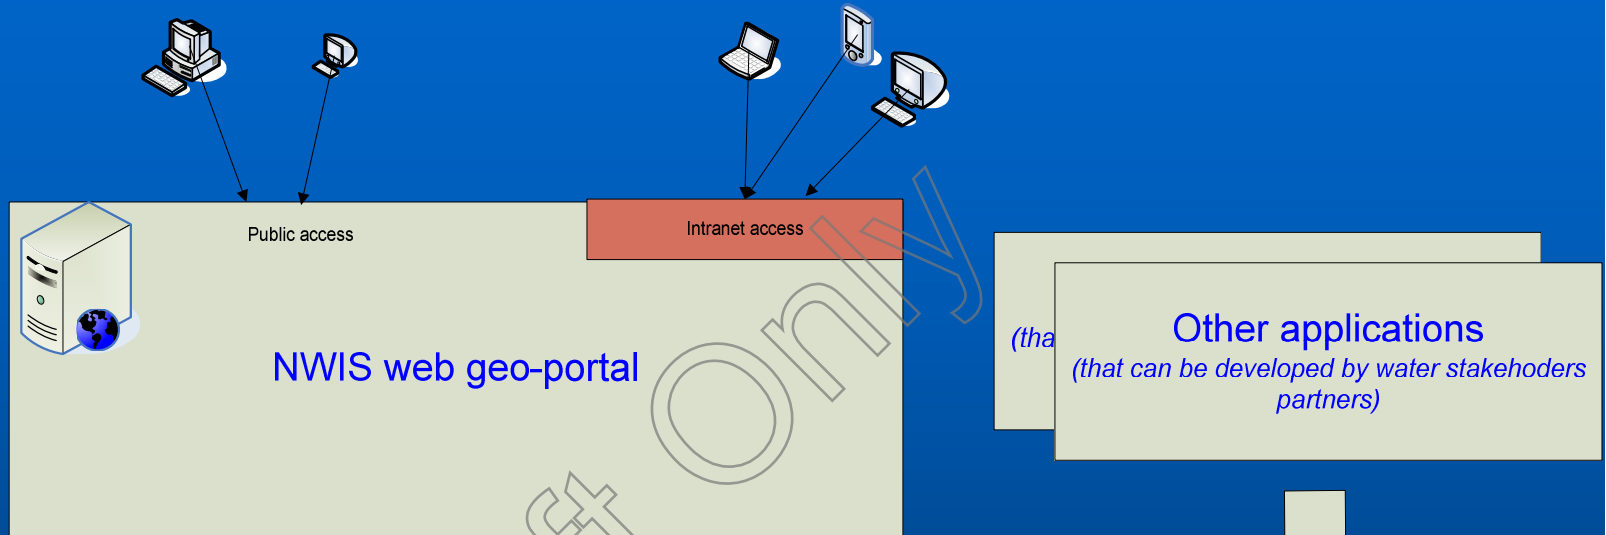

NWIS components

extendable architecture

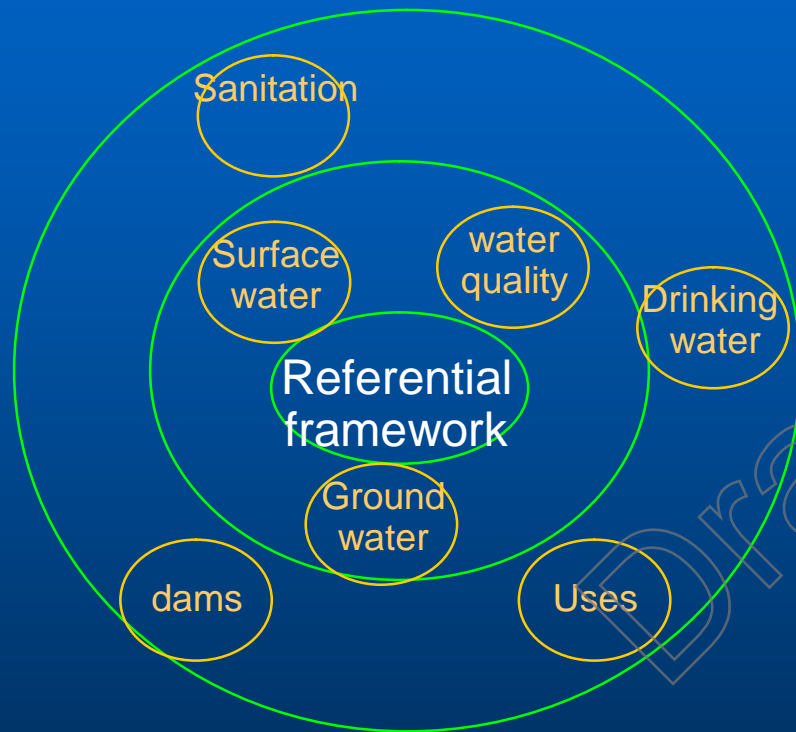

Technical architecture

A step wise integration process

- **Referential framework**
 - ❑ Set by and for the stakeholders
 - ❑ Quality Assurance
- **Sub-systems**
 - ❑ One domain = one leader
- **National system**
 - ❑ Sub-systems integration
 - ❑ Needs going beyond single sub-systems

Typical NWIS roadmap

- High level decision on building a NWIS
- MoU signature, with identification of focal points in each institution
- Fund raising
- Detailed analysis and NWIS specifications, including some sub-systems upgrading
- System implementation and training
- System operation
- Iterative process:
 - New components/public institutions can join later

2
years

Pilot activity on data harmonisation (1/2)

- **System of Environmental-Economic Accounting for Water –SEEA/W**
 - Recognised mandate of National Statistic Institutes
 - Requires a lot of data from different sources

- **NWIS:**
 - Valuable use case for the provision of (raw) data
 - Structuring approach with standardised definitions
 - Water resource community aware of SEEA/W
 - Support provided by the EU MED-Stat programme

Pilot activity on data harmonisation in Tunisia

- **2 technical missions in 2009**
- **Meetings with all the institutional stakeholders**
- **Inputs for the financial agreement with the African Water Facility**
- **Memorandum of understanding signed between 5 ministries for data sharing under SINEAU**
- **Potential technical assistance to the beneficiaries for**
 - Joint preparation of the reference data sets by the national partners
 - Ensuring coherency with international standards

Pilot activity on data harmonisation in Jordan

- **2 technical missions in 2010**
- **Meetings with the main stakeholders**
- **Validation with and commitment from the Minister of water and irrigation**
- **Endorsement by the Jordanian Prime Minister**
- **Draft concept note for a funding request under preparation**

National Workshops

- **State of play on NWIS**
 - (follow up on studies carried out in 2005)
- **Lebanon**
 - 1st definition of a Center for Information and Training on water
- **Egypt**
 - Project identification form for NWIS 1st phase supporting IWRM in the framework of the National Water Resource Plan
- **Palestine**
 - Coordination with UNICEF support for PWA databank, preparation of a training to move towards a NWIS
- **Morocco**
 - willingness of all stakeholder to setup such system, coordination with GTZ supporting a sub-system

- **Turkey: 15 December**
- **Syria: 20 December**

Available from Medwis portal (under development)

- **Generic conceptual data model**
- **Geo-catalogue of data sources and data services (discovery service)**
 - Metadata profile compliant ISO, INSPIRE and WISE
- **Web map viewer**
 - Linked to the geo-catalog
- **Interoperability technical guidelines**
- **NWIS feasibility studies and Med water observation study**
- **Examples of MoU for NWIS**
- **Reporting obligations of Med countries**

Collecting reference data sets for the Med region

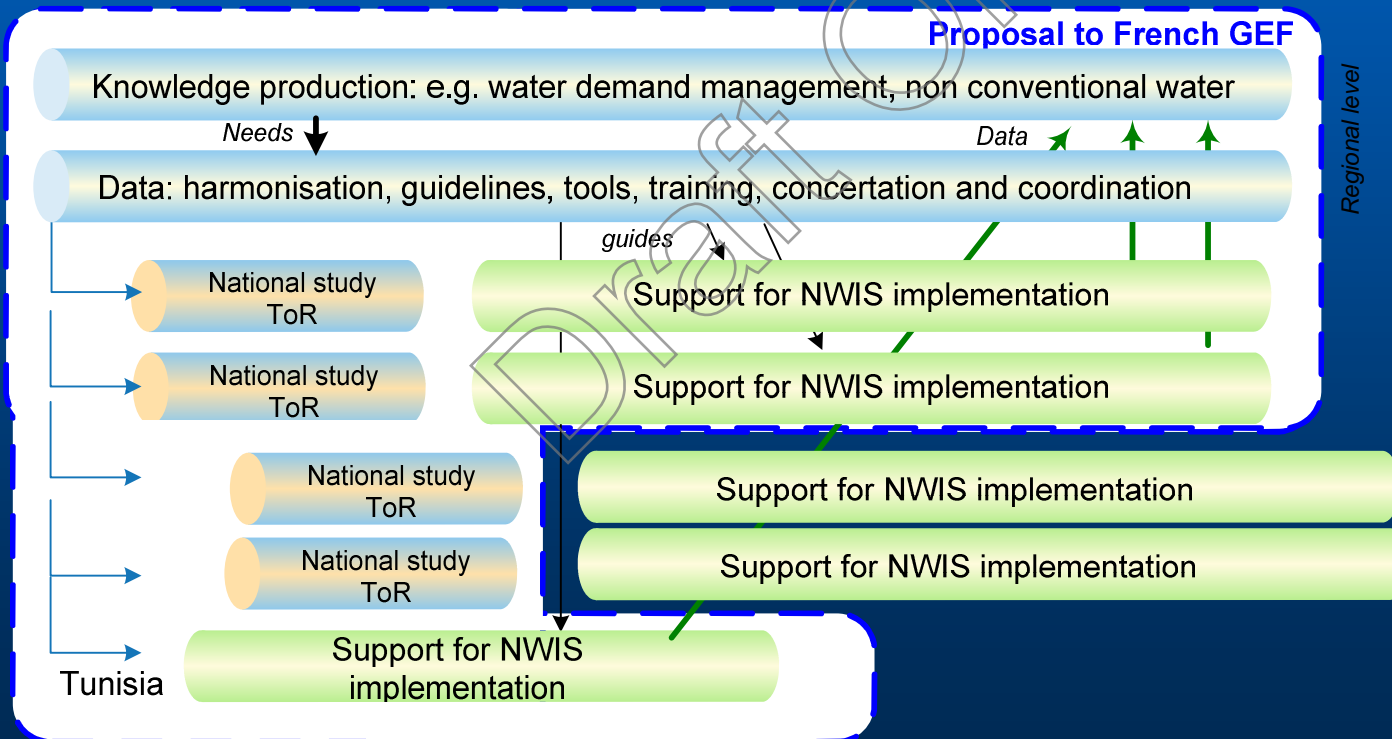

- **Aim: building a reference map at the Mediterranean level, with:**
 - ❑ River basins
 - ❑ Artificial reservoirs and dams
 - ❑ Main rivers and lakes
 - ❑ Aquifers
 - ❑ Administrative units
- **Integration successfully demonstrated with**
 - ❑ Some river basins GIS layers: Tunisia, Israel
 - ❑ EU
 - ❑ List of administrative units
- **Next stage?**
 - ❑ All river basins from voluntary/all countries?
 - ❑ Other reference datasets
 - ❑ Administrative unit layers
 - ❑ Provision of valid metadata for these layers

Med water Knowledge hub: component: « strengthening data management »

- **Response to Ministerial request**
- **Based on Med water observation mechanism study (2006-2007)**
- **Potential funding from French GEF:**

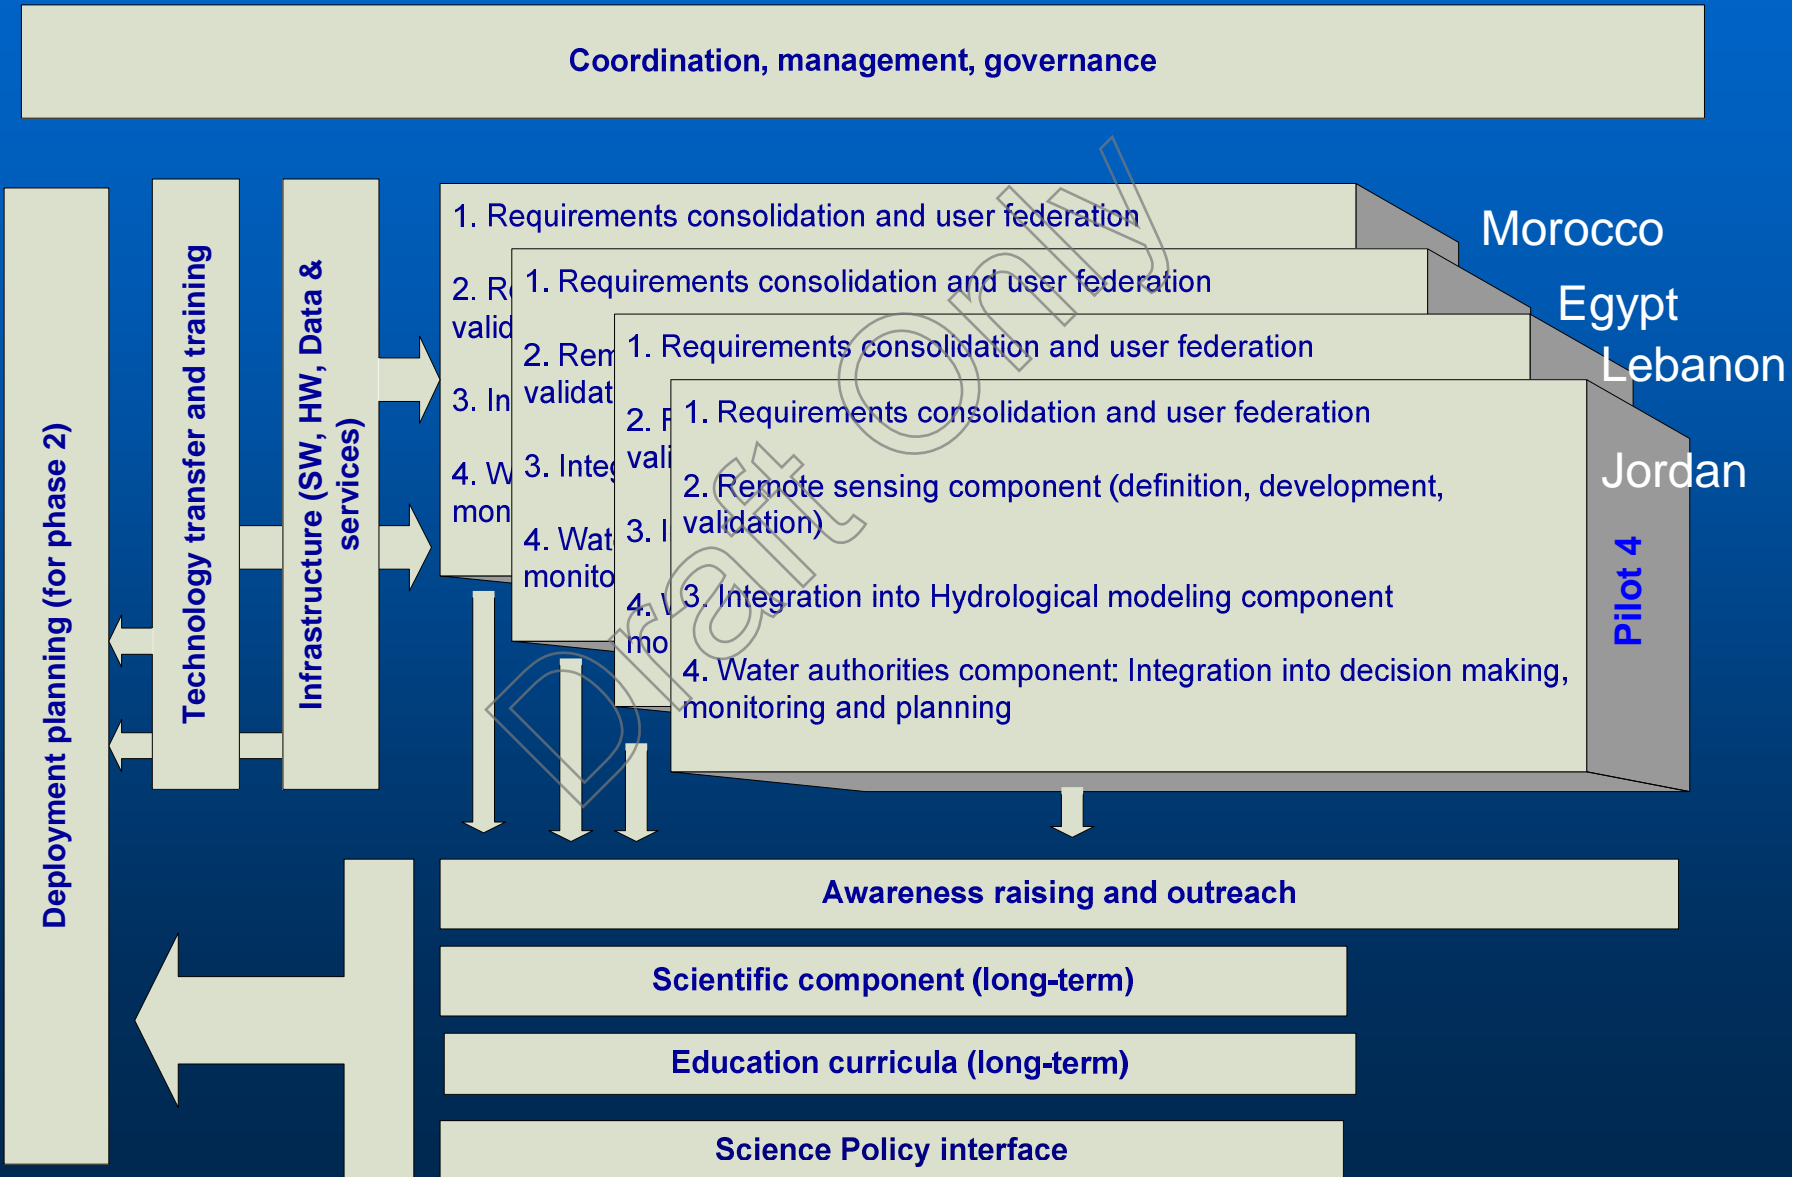

Capacity building programme on Earth observation for water management (1/2)

- **Based on**
 - GMES free data policy
 - TIGER experiences (water sector applications in Africa)
 - NWIS developments
- **Priority areas:**
 - Water availability
 - Flash floods
 - Water quality
 - Water Use
 - Infrastructures & resources management
 - Base maps
- **1st phase – 3 years**
 - EMWIS, ESA and 4 pilot countries for test beds
 - Priority focus on remote sensing institutes and water authorities
 - All countries involved for concertation and dissemination

Capacity building programme on Earth observation for water management (2/2)
