

CALL FOR PRESENTATIONS

CIWEM'S ANNUAL CONFERENCE 2009 WATER & THE GLOBAL ENVIRONMENT

Olympia Conference Centre, London, 29th – 30th April 2009

The way we manage water and the environment are fundamental to our long term future, both in the UK and internationally. In April 2009 CIWEM will hold a two-day Annual Conference that will address multidisciplinary issues across all areas of the global water and environment sector. There will be a mix of keynote speakers, offered papers, exhibitions and networking opportunities that will make this the key event for water and environment professionals.

This conference is organised on an academic model, like the Defra Flood Risk Management conference, where there is **a call for presentations** and speakers will be selected on that basis by the conference organising committee. The details of the call are in the paper attached.

Submission Deadline: August 15th 2008

Presentation summaries should be sent to bob.earll@coastms.co.uk

There are comprehensive **exhibitor and sponsorship packages** for the conference – please contact Justin Taberham for further information, justin@ciwem.org.
