

## First Meeting of the OECD Water Governance Initiative

27-28 March 2013,  
OECD Headquarters, 2 rue André Pascal, Paris  
Room CC 1 (Conference Center)

The OECD Water Governance Initiative provides for a **multi-stakeholder network** and **policy forum** to share ongoing reforms, projects lessons and good practices in support of better governance in the water sector.

The initiative builds on the OECD-led Good Governance Core Group of the 6<sup>th</sup> World Water Forum (Marseille, 12-17 March 2012) and seeks to bridge the gap between two World Water Fora with a community of practice aiming to:

- contributing to the **OECD water governance programme** through peer-reviewing, policy dialogue across decision-makers, exchange of experiences, and design of OECD Principles on Water Governance;
- supporting the **implementation of the governance targets** designed in Marseille up to the 7<sup>th</sup> WWF in Korea;
- setting an **International Observatory** on water governance to collect innovative tools and success stories
- setting up a **Web Portal on Water Governance** to link existing water governance platforms, tools, methodologies and programmes worldwide
- Providing **policy guidance** in support of the global water governance agenda such as the International Year on Water Cooperation and the development of sustainable development goals

The Initiative is composed of **85 delegates** from different geographic and institutional background in OECD and non OECD countries: senior representatives from national governments, local and regional authorities, service providers and their networks, economic and environmental regulators, non-for-profit organisations, river basin organisations and their networks, donors and international financial institutions, international organisations, think tanks and independent experts. Delegates **will meet twice a year** at OECD Headquarters, Paris to implement the Initiative's programme of work, and several thematic and regional working groups (to be defined during the launch meeting) will contribute to the Initiative's objectives throughout the year. The Initiative is hosted by the OECD Public Governance and Territorial Development Directorate. Its strategic orientation relies on a steering committee of 15 members (tic) including the thematic and regional working groups' coordinators, a representative from the World Water Council, a representative from the Korea Forum organisation, and sponsors.

This first meeting of the OECD Water Governance Initiative has the following **objectives**:

1. Agree on the **scope, mandate and activities of the Initiative**;
2. Take stock of the **progress since the 6<sup>th</sup> World Water Forum** in particular for targets related to stakeholder engagement, performance of water services, river basin management, (ground)water security, integrity and transparency in the water sector;
3. Exchange views on “ **The Governance Challenges for Water Policies in Future Cities**”, which will frame OECD water governance programme of work over 2013-2014;
4. Discuss **strategic and operational organisation of the Network**: value added of the Observatory, support to Principles on Water Governance, leadership of regional/thematic working groups, inputs to the global water governance agenda, synergies with forthcoming events etc.
