

The European Meeting on Environmental Chemistry (EMEC) is organised annually on behalf of the Association of Chemistry and the Environment (ACE). It traditionally comprises a broad range of topics within the field of environmental chemistry, and interdisciplinary presentations are very welcome. The EMEC meeting always attracts high quality science presentations and keynote talks from internationally renowned researchers working in environmental chemistry and related fields.

The EMEC16 meeting will continue the tradition of previous meetings. It will provide a wide forum for the exchange of ideas on recent advances in research and development in environmental chemistry and technology, for people from academia, research and industry.

The meeting will be hosted in Torino and it is organized by the Department of Chemistry of the University of Torino and Environment Park S.p.A..

## Main Topics

- Soil chemistry, Soil contamination, Remediation technologies
- Water chemistry, Water treatment, Reuse, Marine chemistry, Marine pollution
- Atmospheric chemistry, Air pollution, Modelling of pollutants transport
- Environmental processes and Reactions, Environmental photochemistry
- Ecotoxicology and Biomarkers
- Green chemistry, Green technologies
- Waste management and recycling
- Analytical methods for environmental science
- Food chemistry
- Emerging contaminants
- Sustainable development, Life cycle assessment, Risk assessment

## About Torino

The Congress will be held in Torino, the first Italian Capital, a city rich of history, culture, known for its numerous restaurants, palaces, squares, parks, theatres, museums and other venues. Turin is one of the major European pole for mechanical, aerospace and high technology companies and is one of the main Italian university cities, hosting the University of Torino (since 1404) and the Polytechnic of Torino.

Turin Airport ([www.aeroporto.torino.it](http://www.aeroporto.torino.it)) is 15 km from city centre, with direct flights to and from national and international airports. Direct train and buses connect the airport with Dora GTT station of Torino and the city center. Buses connect also the city centre with Milano Malpensa airport (2h-travel).

EMEC16 represents an occasion to share new achievements and challenges in environmental chemistry, enjoying history and food typical of Torino. For more information about the city, visit: [www.comune.torino.it/canaleturismo/en/](http://www.comune.torino.it/canaleturismo/en/)

## Main deadlines

Abstract submission: July 15, 2015
