First Call for Abstract

International Conference « Innovation in service of Environment »

Tunis, Tunisie

From 05 to 07 December 2012
At

Tunis International Center for environmental technologies (CITET)

Introduction

There are great planetary challenges resulting from the human activities development, the natural resources scarcity and the environment degradation. Thus, bringing answers and innovative solutions to build a sustainable and better world is becoming a necessity.

More than ever, the environmental challenges require innovations based on green technologies and research applied to environmental problems in order to bring concrete innovative solutions. The purposes of these innovations are to contribute to a more respectful economic development with regard to people and environment.

More attention needs to be paid to human beings inventiveness to conceive and implement adapted solutions to address the great environmental challenges by technical as well as managerial means. This would allow the emergence of a world more respectful toward our environment.

This fifth international conference organized by CITET, will be a forum for innovating research work exchange and research applied to the environment in particular with regard to the following topics:

- Patterns of production and sustainable consumption;
- Innovation and transfer of environmentally sound technologies;
- Impact of the environment on health.
