# Comments on Indicators

- Indicators are produced and maintained by local authorities such as Water Boards and Sewerage Boards
- Some indicators are publicly available by the National Statistical Service
- Data for local areas are also available from each specific Water Board
- Ongoing construction of centralized sewerage systems

# Difficulties Faced

- Data was missing
- Data was not readily available
- Indicator is not used or maintained in the required detail
- Data is fragmented and difficult to compile to national level
- Sewerage Boards have minimal or no data available
- Data available is not in the format required
