Synthesis of Silicon-Based Photonics and One-Dimensional Nanostructures for Various Applications

Mohamed Shaker Salem

1-D Photonic Crystal

Rugate Filter

$$n(x) = n_{av} + \frac{1}{2} n_{peak} \sin\left(\frac{4\pi n_{av} x}{\lambda_o}\right)$$

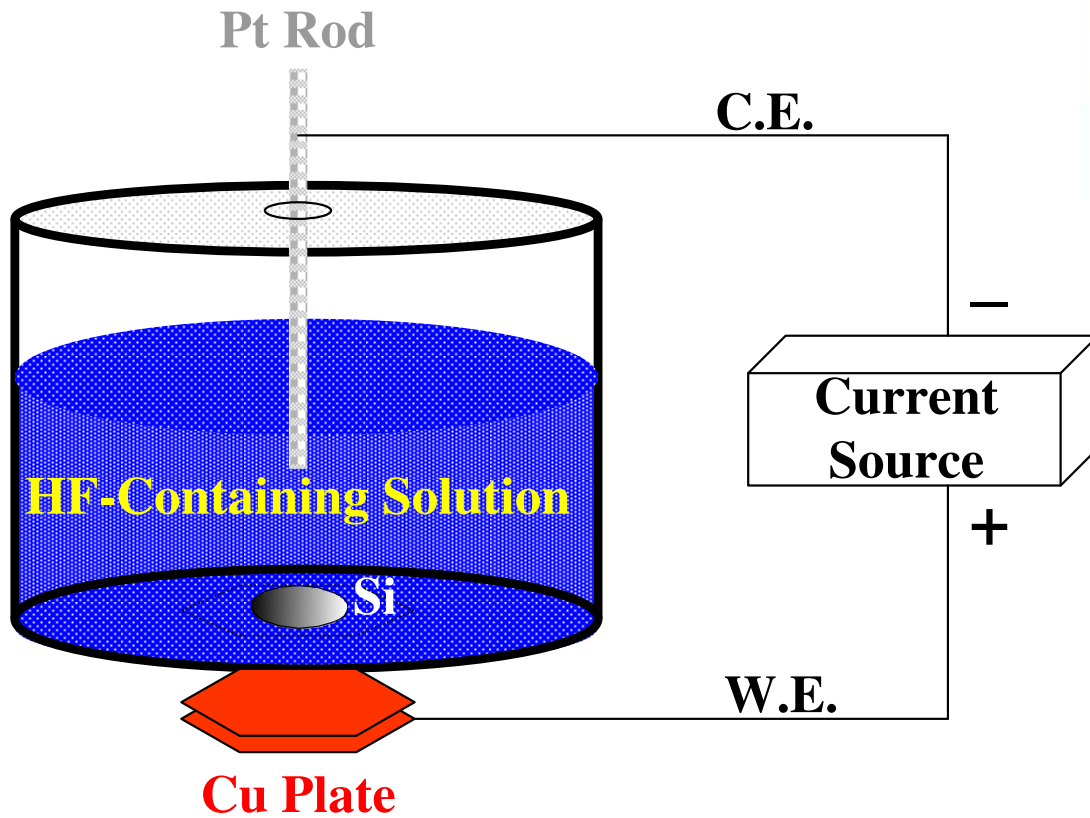

100-Sinusoidal Cycles

Bragg Filter

100-Bragg Stacks 2

Porous silicon formation

Porosity

Refractive Index

Current Density

Thickness

Anodization Time

Porous silicon
photonic crystal
exposed to acetone
vapor. Two vapor/
vacuum dosing
cycles.
